

Grass Harrow

Grass Harrows

Scarifying has long since been regarded as one of the most efficient ways of promoting grass growth, removing weeds and moss, aerating the soil, breaking up sods and surface crusting, improving moisture and herbicide absorption which stimulates grass growth.

Fleming Grass harrows have been designed to cater for all grassland operations as well as parkland maintenance, sand ménages, equestrian centres, gallops, tracks etc.

Designed and manufactured from high quality steel, using a high grade spring steel mat and tine and finished with a 5 stage painting process culminating in oven curing or galvanizing for a hard wearing finish and are available in trailed or three point linkage format.

- Excellent for pasture renovation, breaking up and levelling heavy soil.
- Stimulates growth by aerating and loosening thatch.
- Excellent for ripping out moss, spreading manure, and levelling mole hills.
- Creates good Root aeration for better water infiltration and growth
- Works in fertiliser to both spread and maximise effectiveness
- Surface levelling in equestrian centres, sand ménages, gallops, tracks, etc.
- Strong robust design ensures long life and minimum maintenance
- 64mm x 13mm boron steel mat and tine
- The mat is operated at a 5 degree angle to ensure complete scarifying effect. (no tracking)
- Mounted chain harrows are easy to fold manually.
- Hyd Folding Option
