

Shear Grabs

Models available;
1.2m (4ft) (SG4) – 1.5m (5ft) (SG5)
1.8m (6ft) (SG6)

4ft and 5ft Shear Grabs (SG4, SG5)

- Heavy duty reinforced structural box frame
- Heavy duty side tines for extra strength
- Main beam wear plates with side tine reinforcement
- High performance hydraulic cylinders for reduced power requirements
- Cranked centre tines for clean floor
- Serrated front blade for clean cut and reduced cutting pressure
- Angled smooth side blades for clean side cut
- Heavy duty pivot points for trouble free operation
- Easy access grease points.

Model	Width (m)	Tines	Hyd Rams	Capacity (cu.m)
SG6	1.9	12	3	0.94m ³

Shear Grabs

1.8m (6ft) (SG6) Shear Grab

- 2 HD tines at centre blade
- Reinforced smooth centre cutting blade.
- Specially designed hydraulic flow system for even pressure across the front blade.
- Heavy duty reinforced structural box frame
- Heavy duty side tines for extra strength
- Main beam wear plates with side tine reinforcement
- High performance hydraulic cylinders for reduced power requirements
- Serrated front blade for clean cut and reduced cutting pressure
- Angled smooth side blades for clean side cut
- Heavy duty pivot points for trouble free operation
- Easy access grease points.

Model	Width (m)	Tines	Hyd Rams	Capacity (cu.m)
SG4	1.44	9	2	0.68m ³
SG5	1.67	11	2	0.81m ³
